

Two-Way Texting

Alaska Flight Service is now offering our *Two-Way Texting* option for our users. Two-way texting is a function that allows the pilot to text flight service directly to activate, amend, or close a flight plan.

Emergency services such as Search and Rescue are also available with two-way texting. We are looking to expand this service in the future. We hope you enjoy this new program that flight service has to offer.

Devices:

- Apple SMS Cell
- Android SMS Cell
- SPOTX GPS Tracking Devices

Devices to be added:

- DeLorme
- Garmin InReach
- SpiderTracks
- RockAir
